

# QUIK-REVIEW

## LOG-OFF – DISCONNECT – CLOSE – EXIT OPERATIONS

 OPERATION	FILE MENU ON MENU BAR			RIGHT-CLICK IN NAV TREE	
	LOGOFF	CLOSE	EXIT	DISCONNECT	CLOSE
1. Disconnects from every connected platform or station on the Workbench; will <u>not close</u> the Workbench GUI or remove stations from the Nav Tree	X				
2. Closes the current Workbench window <u>only</u> if more than a single window is open		X			
3. Exits the Workbench		X <sup>1</sup>	X		
4. Disconnects from selected platform(s) or station(s); closes the current session with selected station(s), BUT <u>does not remove</u> it from the Nav Tree				X <sup>2</sup>	
5. Disconnects from selected platform(s) or station(s); closes the current session with selected station(s) AND <u>removes</u> it from the Nav Tree.					X <sup>2</sup>

### NOTES:

1 – if only 1 Workbench window is open; otherwise closes only the current window (see item 2)

2 – may select more than 1 platform/station in the Nav Tree by holding CTRL key and left-clicking mouse. A dialog box will appear verifying whether you want to Disconnect or Close the connection to the selected platform(s) or station(s).
