QUIK-REVIEW: Connecting to a Platform

To connect to a platform on a local or remote host, click the *Open (folder) icon* on the Toolbar.

You can also right-click directly on the host IP (for remote hosts) in the Nav Tree and select Open platform from the pop-up menu.

Complete the fields in the *Open Platform* dialog box as follows:

- *Enter IP address of JACE*
- *Set to whichever port Is used for the platform daemon. (Port 3011 is default.)*
- *Type in a valid station user name & password*
- *If you want Workbench to remember the user name and password, leave this checkbox checked.*

Click the **OK button** to accept all settings.

The Platform connection is established, its icon is displayed in the <u>Nav Tree</u>, and the platform's <u>container</u> view displays in the <u>View Pane</u>.

To disconnect from a platform and <u>dim the</u> platform icon on the Nav Tree, right-click on the platform icon in the Nav Tree and select **"Disconnect"** from the resulting pop-up.

To disconnect from a platform and <u>remove</u> the platform icon from the Nav Tree, right-click on the platform icon in the Nav Tree and select **"Close"** from the resulting pop-up.
