FILE TRANSFER CLIENT / STATION COPIER FUNCTIONALITY

VIEW/TOOL	FUNCTIONS	PLATFORM CONN REQ'D	2-WAY ← →	ACCESS FROM	ANALYSIS
FILE TRANSFER CLIENT	▪ <u>Copy</u> files and folders between local host and remote platforms ▪ <u>Delete</u> files and folders	YES	YES	<u>Workbench</u> Remote platform: Platform tools	<u>Does not</u> check **contents & dependencies** of files copied
	NOTES: *1. Copies ALL files in a station's folder – including backup, alarm and history files.* *2. When updating software, it is best to use the Software Manager vs. the File Transfer Client.*				
STATION COPIER	▪ <u>Install</u> a station to a remote platform ▪ <u>Copy</u> a remote station onto the local host ▪ <u>Delete</u> stations – locally or remotely	YES	YES	<u>Workbench</u> Remote platform: Platform tools	Checks **contents & dependencies** of files copied and displays results
	NOTE: Only copies those files necessary for a station to run; DOES NOT copy backup, alarm or history files				

NOTES:
1. Typically, in a scenario where you are replacing a JACE with a different model, you would use the Station Copier, since you would not need the backup, alarm or history files from the old JACE.
2. See the Training Aid "NiagaraAX Backup/Copy Scenarios" for more detail.
