QUIK-REVIEW

SELECTING COMPONENT VIEWS

Select a container, folder or component from the **Path Bar**.

Right-click a container, file or component and choose a view from the **Views submenu**.*

With a container, file or component selected (and displayed in the Path Bar), choose a view from the <u>View Selector</u> menu.

Double-click on (select) a container, file or component in the **Nav Side Bar** to see its default view.

* Not all views have the same right-click functionality.
